

MANAGEMENT'S DISCUSSION & ANALYSIS

For the three and six months ended June 30, 2015

## **EUROMAX RESOURCES LTD.**

Management's Discussion and Analysis

For the three and six months ended June 30, 2015

---

### **INTRODUCTION**

The following Management's Discussion and Analysis ("MD&A") of Euromax Resources Ltd. ("Euromax" or "the Company") and its subsidiary companies (collectively, the "Group") is prepared as of August 24, 2015 and should be read in conjunction with the Group's unaudited condensed consolidated interim financial statements and related notes for the six months ended June 30, 2015 ("1H-2015") and the audited consolidated financial statements for the year ended December 31, 2014 ("FY14"), which are prepared in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB"). The Group's functional and reporting currency is the Canadian dollar and all figures in this MD&A are in Canadian dollars unless otherwise indicated.

Some of the statements in this MD&A are forward-looking statements that are subject to risk factors set out in the cautionary note contained herein.

Euromax's common shares are listed on the TSX Venture Exchange ("TSXV") under the trading symbol "EOX".

### **CORPORATE STRATEGY**

The Group's ambition is to become the leading gold and base metal mining company in Europe. We will strive to set the standard for developing mines in Europe by using best industry practices at our operations and implementing the highest standard for environmental management and managing health and safety in the work place.

The Group mission is to bring Ilovica gold-copper project in Macedonia ("Ilovica Project") into production within the next five years and grow the value of our business by maximising the potential of the Ilovica Project as our flagship asset. Delivery of value for our shareholders is key and we intend to pursue a suite of financing alternatives such that we may grow our business without diminishing value for shareholders.

As part of all our activities we will engage with and empower communities to be part of our projects and we will look to create mutually beneficial opportunities for all our stakeholders including local businesses, communities and employees.

### **1H-2015 HIGHLIGHTS**

#### ***US\$175 million Gold Purchase and Sale Agreement with Royal Gold***

On October 20, 2014, the Group entered into a Gold Purchase and Sale Agreement ("GPSA") with Royal Gold, AG ("Royal Gold") pursuant to which the Group via its wholly-owned subsidiaries agreed to sell an equivalent of 25% of future gold production from the Ilovica Project to Royal Gold to a maximum of 525,000 ounces and then 12.5% gold produced thereafter. In consideration, Royal Gold will pay US\$175 million to the Group as an advance payment on the purchase price of Ilovica's future gold production.

On March 2, 2015 the Group entered into a First Amendment to the GPSA with Royal Gold and closed the initial stage of the transaction. Euromax received the initial tranche of US\$ 7.5 million in two equal instalments of US\$3.75 million on March 2 and March 23, 2015.

The Group will receive a second tranche of US\$7.5 million on the first anniversary of the signing date of the GPSA, subject to the satisfaction of certain conditions, and the third tranche of US\$160 million will be received, pro-rata with other funding sources, over the course of the construction period for the Ilovica Project, subject to the satisfaction of certain conditions.

Under the GPSA, Euromax is permitted to raise up to US\$215 million of senior ranking debt finance to fund mine construction and operations, as well as capital equipment leases and equipment financing customary for similar projects. Royal Gold's security interest will be subordinated to that of the permitted senior ranking debt finance under arrangements to be agreed with the senior financiers. Royal Gold's security interest falls away once its entire advance payment has been credited against gold deliveries.

### **1H-2015 HIGHLIGHTS - CONTINUED**

#### ***In-Principle UFK Eligibility and Mandating of Société Générale S.A., UniCredit Bank AG and Caterpillar Financial to arrange and provide a US\$240 million Debt Package***

On February 16, 2015, a UFK in-principle eligibility ("UFK Support") was received for the German Untied Loan Guarantee Scheme (UFK – Garantien für Ungebundene Finanzkredite) to provide cover for a project finance facility on the assumption that a copper concentrate offtake agreement is entered into with a German owned smelter and subject to due diligence and approval by the German Government.

On April 24, 2015 Euromax Resources Ltd and Euromax Resources DOO Skopje executed a Mandate Letter and Term Sheet with Société Générale S.A. and UniCredit Bank AG and Unicredit Bank Austria AG to provide up to US\$215 million of Senior Secured Project Finance ("Project Facility"), subject to due diligence and all necessary approvals, which alongside the GPSA shall be used to finance the development of the Ilovica Project. The key terms of the Project Facility are:

- Facility amount of up to US\$215 million;
- Tenor of up to 12 years, subject to the UFK Support;
- Pre-completion Margin of 3.75% - 4.25% above Libor; Post-completion Margin of 2.75% - 3.25% above Libor; and
- Customary financial ratios, security, completion support and covenants for a facility of this nature.

On April 28, 2015 Euromax Resources Ltd and Euromax Resources DOO Skopje executed a Mandate Letter and Term Sheet with Caterpillar Financial to arrange an equipment financing facility for up to US\$25 million ("Equipment Facility"), to finance any Caterpillar equipment purchased for the Ilovica Project. Key terms of the Equipment Facility:

- Facility amount of up to US\$25 million;
- Tenor of up to 5 years,
- Margin of 4.50% - 5.50% above Libor; and
- Customary financial ratios, security, completion support and covenants for a facility of this nature.

#### ***Ilovica Feasibility Study***

Following on from our successful Preliminary Feasibility Study ("PFS") work commenced on the Ilovica Definitive Feasibility Study ("DFS") which will be carried out by a consortium of engineering and consulting groups, including:

- Geology and Resources – Tetra Tech, UK;
- Mining – DMT, UK;
- Metallurgical testing – SGS Mineral Services, UK;
- Plant and Mine Infrastructure – Amec Foster Wheeler (AFW), Johannesburg;
- Tailings Management Facility – Golders Associates, UK in association with the Skopje Faculty of Civil Engineering;
- Hydrology and Hydrogeology – Schlumberger Water Services (SWS), UK; and
- Environmental and Social baseline and impacts – Golder Associates and Schlumberger Water Services.

All groups are now engaged with work on the project and site work comprising resource drilling, geotechnical drilling and site investigation, environmental monitoring, infrastructure investigations and assessment of local contractors is well advanced. The DFS is scheduled to be finalised by the end of 2015.

#### ***Euromax Exploration Services EOOD ("EES")***

EES has continued delivering its exploration services on its first work order, under a five-year framework agreement, on the Babjak and Zlataritzta projects in Bulgaria. Management is delighted with the progress made at EES during the first half of 2015, which has recorded revenues of \$1.303 million and gross profits \$0.243 million and contributed to reducing the Group's monthly cash burn rate.

Looking forward, EES management has agreed a 2015 work programme for the Babjak and Zlataritzta projects and potential exists for additional work to be performed in future periods both on these projects as well as other projects owned by its sole customer. Notwithstanding this EES management are pursuing contracts with other mineral exploration companies operating in Europe.

### Management's Discussion and Analysis

For the three and six months ended June 30, 2015

## PROJECTS

This section outlines the exploration activities carried out in the six month ended on June 30, 2015. Patrick Forward, Chief Operating Officer, is the Qualified Person responsible for the review of the technical information contained in this section of the Group's MD&A.

### Ilovica Project – Macedonia

In the second quarter, Euromax gave an update on the drilling programme at Ilovica. The current drill programme comprises infill drilling to a nominal hole spacing of 50 metres and is aimed at converting indicated mineral resource category material to the measured category and converting in-pit inferred resource category material to the indicated category using CIM guidelines. The programme was designed to provide at least measured resources within the planned open pit's first five years of production. To date a total of twenty drill holes totalling 4,897 metres have been drilled. The results can be summarised as follows:

DH №	Easting	Northing	Azimuth	Dip	Depth	From (m)	To (m)	Length (m)	Au (g/t)	Cu (%)
EOIC1572	7,654,296	4,595,269	215	(55)	300	149.0	300.1	151.1	0.51	0.27

## EUROMAX RESOURCES LTD.

Management's Discussion and Analysis

For the three and six months ended June 30, 2015

### PROJECTS - CONTINUED

#### Ilovica Project – Macedonia - continued

Intercepts calculated to a 0.3 g/t gold equivalent cut-off (\$1250/oz Au, \$3/lb Cu), including intercepts calculated to a 0.5 g/t gold equivalent cut-off (\$1250/oz Au, \$3/lb Cu) assuming 100% recovery. Coordinate system is GCS Hermannskogel. Mineralisation is of a pervasive porphyry style comprising vein stockwork and impregnations and widths are therefore considered representative of the overall body.

The infill drilling forms part of the current feasibility study (DFS) following the successful completion of the pre-feasibility study (PFS) last year. The DFS is due for completion by the end of the year, is to date on schedule and on budget and comprises but is not restricted to the following major pieces of work:

##### Mineral Resource Update –Tetra Tech

Aimed at improving the resource classification and revised block model following completion of in-fill drilling.

##### Mining Study – DMT

Re-optimisation of the open pit using the revised block model and pit slope stability following a programme of 7 geotechnical drill holes (complete), detailed pit design and scheduling, waste dump planning, mining operating and capital costs and an updated reserve.

##### Metallurgical Testwork – SGS Mineral Services

Programme of representative large scale comminution tests accompanied by variability tests on samples taken from across the in-pit mineralisation to verify comminution circuit, process route, reagent levels, recoveries and waste rock characteristics.

##### Plant and Mine Infrastructure – Amec Foster Wheeler

This is the largest single contract for the DFS and as well as the process engineering and design the study will include geotechnical, civil, structural, mechanical, electrical, piping, control and instrumentation engineering and design for the plant and mine site. The study also will include capital and operating cost estimation, procurement, contract and execution planning.

##### Tailings Management Facility – Golder Associates in association with the Saint Cyril and Methodius University Faculty of Civil Engineering in Skopje

Based on the preliminary design in the PFS, detailed geotechnical site investigation, civil engineering and tailings characterisation modelling, capital cost estimation.

##### Hydrology and Hydrogeology - SWS

A programme of monitoring of all surface water, selected wells, exploration drill holes, dedicated hydrogeological holes and a collection of all publicly available data has been underway under the management of SWS for approximately two years. SWS are also constructing detailed hydrological, hydrogeological and geochemical models based on the monitoring and on waste and processed rock characterisation. The programme includes a detailed assessment of acid rock drainage and planning for mitigation of any associated risks.

##### Social and Environmental Impacts – Golder Associates with SWS

This will be based on the above engineering studies and baseline data that has been collected over the past two years in a programme managed by Golder Associates and SWS and in collaboration with various environmental and social study experts in Macedonia. The work forms part of the programme both companies are carrying out towards an updated Environmental and Social Impacts Assessment.

#### Karavansalija Mineralised Complex (“KMC”) Gold-Copper Project – Serbia

Drilling of a single deep hole on the Gradina Prospect to investigate geophysical and geochemical anomalies and to test the extensions of the adjacent drill intercepts started in February. During this six months period ended June 30, 2015, the Company announced positive results of the diamond core drilling completed at the Gradina Prospect.

The 2015 drill programme comprises a single hole, EOKSC1565, drilled to test the extension of the skarn gold intercepts encountered in EOKSC 1361b, in 2013. The drill hole location and technical parameters are:

DH No	Easting	Northing	Azimuth	Dip	Depth	From (m)	To (m)	Length (m)	Estimated true		
									Width (m)	Au (g/t)	Zn (%)

## **EUROMAX RESOURCES LTD.**

Management's Discussion and Analysis

For the three and six months ended June 30, 2015

---

### **RESULTS OF OPERATIONS - CONTINUED**

#### ***DETAILED ANALYSIS OF THE SIX MONTHS ENDED JUNE 30, 2015 COMPARED TO SIX MONTHS ENDED JUNE 30, 2014***

Net loss after tax attributable to the Owners of the Company of \$6.204 million or \$0.05 per share in 1H-2015 increased for the Group from \$3.889 million or \$0.05 per share in 1H-2014 due to the following:

- Share-based payment expense increased by \$1.95 million predominately due to the Company's share price appreciating more than 147% since its year end closing price of \$0.21 which increased the Group cash settled share based payment liabilities at June 30, 2015.
- The Group's loss on foreign exchange increased by \$0.452 million mainly due to the liquidation of a group subsidiary where the foreign currency translation reserve of \$0.222 million was recycled to the income statement during the quarter in accordance with International Accounting Standards. In addition to that, approximately \$0.230 million of these losses have resulted from the weakening of the Euro, during the year to date.
- Finance expenses increased \$0.267 million which mainly consists of amortised transaction costs relating to closing the initial tranche under the GPSA with Royal Gold.
- Accounting, legal and professional fees increased by \$0.233 million owing to transaction costs on a potential financing arrangement which the Group aborted during the period.
- Travel costs have increased by \$0.161 million resulting from an increased level of marketing and investor relation activities during the period compared to 1H-2014.
- Salaries, director and management fees increased by \$0.132 million as the Group transferred a number of corporate functions from London to Skopje in order to increase Euromax's profile in Macedonia. Offsetting this saving was a one-off redundancy cost incurred in Q1-2015.

Partially offset by:

- The loss on sale of Euromax Services EOOD of \$0.949 million recognised during 1H-2014, which relates primarily to the recycling of currency translation reserve losses related to Euromax Services EOOD to the income statement.

#### ***DETAILED ANALYSIS OF THE QUARTER ENDED JUNE 30, 2015 COMPARED TO QUARTER ENDED JUNE 30, 2014***

The Group recorded a net loss after tax attributable to the Owners of the Company of \$2.678 million or \$0.02 per share in the quarter ended June 30, 2015 ("Q2-2015"), compared to \$2.677 million or \$0.03 per share in the quarter ended June 30, 2014 ("Q2-2014"). The increased quarter on quarter loss was mainly due to the following:

- Share-based payment expense increased by \$0.541 million predominately due to the Company's share price appreciating more than 73% since its March 31, 2015 closing price of \$0.30 which increased the Group cash settled share based payment liabilities at quarter end.
- The Group's loss on foreign exchange increased by \$0.187 million mainly due to the funds received under the GPSA with Royal Gold as result of the strongly appreciating US dollar, as well a weakening of the Euro during this quarter.
- Finance expenses increased by \$0.102 million which predominately consists of amortised transaction costs relating to closing the initial tranche under the GPSA with Royal Gold.
- Travel costs and accounting, legal and professional fees have increased by \$0.116 million and \$0.088 million, respectively, due to the greater level of operating activity in Q2-2015 relating to the progress of the Ilovica Project DFS.

Offset by:

- The loss on sale of Euromax Services EOOD of \$0.949 million recognised during Q2-2014, which relates primarily to the recycling of currency translation reserve losses related to Euromax Services EOOD to the income statement.
- Salaries, director and management fees have decreased by \$0.123 million largely resulting from the transfer of certain corporate function from London to Macedonia.

## **EUROMAX RESOURCES LTD.**

Management's Discussion and Analysis

For the three and six months ended June 30, 2015

---

### **LIQUIDITY AND CAPITAL RESOURCES**

At June 30, 2015 the Group had cash and cash equivalents of \$6.279 million, trade and other receivables of \$1.628 million and trade and other payables totalling \$2.519 million. In addition to this the Company had gold purchase advance payments totalling \$9.135 million and share-based payment liabilities amounting to \$4.157 million for which significant cash payments are not anticipated to occur in the foreseeable future. Refer to note 9(b) of the unaudited condensed consolidated interim financial statements for the 6 months ended June 30, 2015 for further details.

#### Operating Activities

Trade and other receivables increased to \$1.628 million at June 30, 2015, compared to \$0.199 million at December 31, 2014. This was due to the outstanding invoices issued by EES to its customer, representing \$0.840 million, together with increased VAT receivables in Macedonia due to the commencement of the DFS on the Ilovica Project, representing \$0.620 million.

Trade and other payables were \$2.519 million at June 30, 2015, compared to \$1.710 million at December 31, 2014. The substantial increase in this balance has been driven by the aggressive commencement of the DFS on the Ilovica Project.

Cash used in operations in 1H-2015, before changes in non-cash working capital items, was \$3.068 million compared to \$1.641 million in 1H-2014. This \$1.427 million increase in cash used in operating activities in 1H-2015 versus 1H-2014 is due to substantially increased activities in Macedonia to support the DFS on the Ilovica Project, transaction costs on an aborted financing arrangement and the cost of redundancies in the London corporate office where a number of corporate functions of the Group were transferred to the expanded Skopje office.

#### Financing Activities

During the period ended June 30, 2015, the Group closed a private placement issuing 31,495,397 common shares at an issue price of \$0.25 per share raising gross proceeds of \$7.874 million of which \$1.700 million had been received in the year ended December 31, 2014. Additionally \$9.351 million of gold purchase advance payments were received from Royal Gold representing receipt of the initial tranche of funding from the GPSA.

Offsetting these financing proceeds was the repayment of the working capital loan facility of \$0.742 million, GPSA transaction costs of \$0.391 million, share issue costs of \$0.303 million and interest paid of \$0.128 million.

In 1H-2014 cash used in financing activities was \$0.012 million and related to interest paid.

#### Investing Activities

Cash used in investing activities in 1H-2015 amounted to \$4.990 million which includes \$4.627 million of capital expenditures on unproven mineral right interests, mainly focussed on the Ilovica Project and purchases of property, plant and equipment and intangible assets of \$0.464 million. This was offset by \$0.100 million proceeds received from the sale of a 4% interest in KMC and interest received of \$0.001 million.

The Group provided cash of \$1.910 million from investing activities in 1H-2014 which includes \$3.023 million of proceeds received from the sale of Euromax Services EOOD, and offset by \$1.063 million paid for further exploration of the Group's exploration projects with the majority focussed on the Ilovica Project in Macedonia and \$0.050 million paid for acquired property, plant and equipment.

The Group is in the exploration and evaluation stage of the mining life cycle and has limited recurring sources of operating cash flow. The Group's ability to continue operations is contingent on its ability to obtain additional financing and progress the Ilovica Project into commercial production. Refer to Note 3 of the unaudited condensed consolidated interim financial statements for the 6 months ended June 30, 2015 for further details.

The table below summarises the expenditures incurred on the Group's key projects during 1H-2015 and 1H-2014.

**RELATED PARTY TRANSACTIONS**

Details of the transactions between the Group and other related parties are disclosed below.

**(a) Key management personnel compensation**

The remuneration of directors and other members of key management personnel during the periods ended June 30, 2015 and 2014 was as follows:

	Note	Six months ended June 30,	
		2015	2014
		\$000s	\$000s
Short-term employee benefits		588	674
Post-employment benefits	(i)	53	67
Redundancy payments	(ii)	93	-
Share-based payments	(iii)	3,094	1,127
		3,828	1,868

- (i) Executive directors and other key management personnel receive pension contributions equal to 10% of their salary to their individual pension plans;
- (ii) The Company's VP Legal Affairs and Corporate Secretary was made redundant on January 30, 2015.
- (iii) Share-based payments are the cost of share options, RSUs and DPUs granted to directors and key management personnel.

## **EUROMAX RESOURCES LTD.**

Management's Discussion and Analysis

For the three and six months ended June 30, 2015

---

### **RELATED PARTY TRANSACTIONS**

#### **(b) *Deferred Phantom Unit Plan***

In 2013 Euromax introduced a Deferred Phantom Unit Plan ("DPU Plan") for its directors and key management personnel. Under the terms of the plan the non-executive directors elected to convert their outstanding unpaid directors' fees into DPUs in lieu of cash as payment for their directors' fees. From April 2013, non-executive directors made semi-annual elections to receive DPUs in lieu of cash for their fees. In March 2015 all non-executive directors, except for Mr Bill Abel elected to receive DPUs in lieu of cash until September 30, 2015.

All DPUs issued by Euromax are cash-settled share-based payments and therefore all vested DPUs are revalued at the Company's reporting period end share price with any fair value changes recorded in the income statement. Under the terms of the DPU Plan, for each DPU that vests cash will only become payable in the event that the director or key management person leaves the Company.

The total DPUs in issue at June 30, 2015 is 9,726,150 inclusive of DPUs granted to the Company's non-executive directors. Share-based payment liabilities of \$4.157 million (December 31, 2014: \$1.586 million) are recognised as current at June 30, 2015. The DPU expense for the three and six months ended June 30, 2015 is \$1.542 million and \$2.757 million (2014: \$0.993 million and \$0.937 million), retrospectively.

Resulting from the redundancy of the VP Legal Affairs and Corporate Secretary on January 30, 2015, cash payments of \$0.186 million was made in respect of vested DPUs.

#### **(c) *Working capital loan***

On October 31, 2014 the Company arranged and closed a working capital loan from its directors. The working capital loan was unsecured and repayable in full on or before April 30, 2015. Interest of 15% was payable on the working capital loan amount which was fully accrued and reported as a finance expense in the statements of loss and comprehensive loss for the year ended December 31, 2014.

During the six months ended June 30, 2015, the working capital loan was repaid to the directors in full, through payment of \$0.742 million of the loan and \$0.111 million of interest.

### **CRITICAL ACCOUNTING ESTIMATES**

The Group's significant accounting policies are summarised in the audited consolidated financial statements for the year ended December 31, 2014. The preparation of consolidated financial statements in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board which requires management to select accounting policies and make estimates and judgements that may have a significant impact on the consolidated financial statements.

The Group regularly reviews its estimates; however, actual amounts could differ from the estimates used and, accordingly, materially affect the results of operations.

## **EUROMAX RESOURCES LTD.**

Management's Discussion and Analysis

For the three and six months ended June 30, 2015

---

### **OPERATIONAL AND OTHER BUSINESS RISKS AND UNCERTAINTIES**

The following risk factors, as well as risks not currently known to the Group, could materially adversely affect the Group's future business, operations and financial position and could cause them to differ materially from the estimates described in the forward-looking statements and information contained herein. The risks set out below include those that are widespread and associated with any form of business and those that are specific risks associated with the Group's business and its involvement in the exploration and mining industry generally, and in south-eastern Europe in particular. Shareholders and prospective investors should carefully consider, in light of their own financial circumstance, the factors set out herein.

#### **Global Financial Conditions**

Global financial conditions in recent years have been characterised by volatility and several financial institutions have either gone into bankruptcy or have had to be rescued by governmental authorities. Access to financing has been negatively impacted by many factors as a result of the global financial crisis. This may impact the Group's ability to obtain financing in the future at all, or on reasonable terms. Additionally, global economic conditions may cause decreases in asset values that are deemed to be other than temporary, which may result in impairment losses.

#### **Fluctuation of Commodity Prices**

The Group's exploration and other mining activities have previously been, and may in the future be, significantly adversely affected by declines in commodity prices, particularly gold and copper. Commodity prices are volatile and are affected by numerous factors beyond the Group's control such as the sale or purchase of metals by various central banks and financial institutions, interest rates, exchange rates, inflation or deflation, fluctuation in the value of the United States dollar and foreign currencies, global and regional supply and demand, and the political and economic conditions of major mining countries throughout the world.

Any future serious drop in commodity prices or sustained low commodity prices could adversely impact the Group's future revenues, profits and cash flows. In particular, sustained low, or further reductions in, commodity prices could:

- reduce or eliminate the Group's ability to finance the exploration of existing and future mineral projects;
- force the Group to lose its interest in, or to sell, all or some of its properties;
- halt or delay the development of existing or new projects; and
- reduce the value of the Group's securities.

Furthermore, declining or sustained low commodity prices could impact the Group's operations by requiring a reassessment of the feasibility of any existing or new projects. Even if the project is ultimately determined to be economically viable, the need to conduct such a reassessment may cause substantial delays or may interrupt operations until the reassessment can be completed.

#### **Dependence on Third Party Financing**

The Group currently has no source of operational cash flow. As a result, the Group will continue to depend on third party financing to fund future working capital, capital expenditures, operating and exploration costs and other general corporate requirements. The success and the pricing of any such capital raising and/or debt financing will be dependent upon the prevailing market conditions at that time for junior exploration and development companies to attract significant amounts of debt and/or equity. There can be no assurance that such financing will be available to the Group or, if it is, that it will be offered on acceptable terms. Failure to obtain sufficient financing, as and when required, may result in a delay or indefinite postponement of exploration or development on any or all of the Group's properties.

#### **Dilution**

The Group may require additional funds to fund development and exploration programmes and potential acquisitions. The Group cannot predict the size of future issuances of common shares or the issuance of debt instruments or other securities convertible into shares or the effect, if any, that future issuances and sales of the Group's securities will have on the market price of the common shares. If it raises additional funding by issuing additional equity securities, such financing may substantially dilute the interests of existing shareholders. Sales of substantial amounts of common shares, or the availability of such common shares for sale, could adversely affect the prevailing market prices for the Group's securities.

## **EUROMAX RESOURCES LTD.**

Management's Discussion and Analysis

For the three and six months ended June 30, 2015

---

### **OPERATIONAL AND OTHER BUSINESS RISKS AND UNCERTAINTIES - CONTINUED**

#### **No Dividends**

The Group has never paid cash dividends. It currently intends to retain future earnings, if any, to fund the development and growth of its business, and may not pay any cash dividends for the foreseeable future. Furthermore, the Group may in the future become subject to contractual restrictions on, or prohibitions against, the payment of dividends. As a result, investors will have to rely on capital appreciation, if any, to earn a return on their investment in common shares in the foreseeable future. The payment of future dividends, if any, will be reviewed periodically by the Group's board of directors and will depend upon, among other things, conditions then existing including earnings, financial condition and capital requirements, restrictions in financing agreements, business opportunities and conditions and such other factors deemed by the board of directors to be relevant at the time.

#### **Currency Risk**

The Group maintains most of its working capital in US dollars. The Group currently operates in Bulgaria, Macedonia and Serbia and its operating costs are incurred in a combination of Bulgarian Lev, Macedonian Denar, Serbian Dinar, United States Dollars, British Pounds or Euros. Accordingly, the Group is subject to fluctuations in the rates of currency exchange between these currencies. The Group has not hedged its exposure to currency fluctuations.

#### **Economic and Political Instability in Foreign Jurisdictions**

The Group currently operates in Bulgaria, Macedonia and Serbia. There are risks to conducting business in foreign countries. These risks may include, among others, invalidation of governmental orders and permits, uncertain political and economic environments, sovereign risk, war, civil disturbances, arbitrary changes in laws or policies, the failure of foreign parties to honour contractual relations, delays in obtaining or the inability to obtain necessary governmental permits, authorizations and consents, limitations on foreign ownership, limitations on the repatriation of earnings, limitations on exports, instability due to economic under-development, inadequate infrastructure and increased financing costs. In addition, the enforcement by the Group of its legal rights to exploit its properties may not be recognised by any foreign government or by the court system of a foreign country. These risks may limit or disrupt the Group's operations, restrict the movement of funds or result in the deprivation of mining related rights or the taking of property by nationalization or expropriation without fair compensation.

#### **Mineral Exploration**

Mineral resource exploration is highly speculative, involves substantial expenditures, and is frequently unsuccessful. Few prospects that are explored are ultimately developed into producing mines. To the extent that the Group continues to be involved in exploration, the long-term success of its operations will be related to the cost and success of its exploration programmes. There can be no assurance that the Group's exploration efforts will be successful. The success of exploration is determined in part on the following factors:

- the identification of potential mineralization based on superficial analysis;
- availability of prospective land;
- availability of government-granted exploration and exploitation permits;
- the quality of management and geological and technical expertise; and
- the capital available for exploration and development.

Substantial expenditures are required to determine if a project is economically feasible. It could take several years to establish proven and probable mineral reserves and to develop and construct mining and processing facilities. As a result of these uncertainties, there can be no assurance that current and future exploration programmes will result in the discovery of mineral reserves and the development of mines.

#### **Resource Estimates**

The mineral resource estimates presented herein are made by Group personnel and independent geologists. These estimates depend upon geological interpretation and statistical inferences drawn from drilling and sampling analysis, which may prove to be unreliable. There can be no assurance estimates will be accurate. The inclusion of mineral resource estimates should not be regarded as a representation that these amounts can be economically exploited and no assurances can be given that such resource estimates will be converted into reserves. Different experts may provide different interpretations of resource estimates.

## **EUROMAX RESOURCES LTD.**

Management's Discussion and Analysis

For the three and six months ended June 30, 2015

---

### **OPERATIONAL AND OTHER BUSINESS RISKS AND UNCERTAINTIES - CONTINUED**

#### **Capital and Operating Cost Risks**

The Group's forecasts and technical reports are based on a set of assumptions current as at the date of completion of these forecasts and studies. The realised operating and capital costs achieved by the Group may differ substantially owing to factors outside the control of the Group, including currency fluctuations, supply and demand factors for the equipment and supplies, global commodity prices, transport and logistics costs and competition for human resources. Though the Group incorporates a level of contingency in its assumptions, these may not be adequate depending on market conditions.

The mining business is capital intensive and the development, exploration and exploitation of mineral reserves and resources and the acquisition of machinery and equipment require substantial capital expenditure. The Group has a number of exploration and development projects which will involve significant capital expenditure to progress.

Further, the Group relies on certain key third-party suppliers and contractors for equipment, raw materials and services used in, and the provision of services necessary for the continuing exploration and development of its projects. As a result, the Group's operations at its sites are subject to a number of risks, some of which are outside of the Group's control, including negotiating agreements with suppliers and contractors on acceptable terms, the inability to replace a supplier or contractor and its equipment, raw materials or services in the event that either party terminates the agreement, interruption of operations or increased costs in the event that a supplier or contractor ceases its business due to insolvency or other unforeseen events and failure of a supplier or contractor to perform under its agreement with the Group. The occurrence of one or more of these risks could have a material adverse effect on the Group's business, results of operations and financial position.

#### **Operating Hazards and Other Uncertainties**

The Group's business operations are subject to risks and hazards inherent in the mining industry. The exploration for and the development of mineral deposits involves significant risks, including:

- environmental hazards;
- discharge of pollutants or hazardous chemicals;
- industrial accidents;
- labour disputes and shortages;
- supply and shipping problems and delays;
- shortage of equipment and contractor availability;
- unusual or unexpected geological or operating conditions;
- fire;
- changes in the regulatory environment; and
- natural phenomena such as inclement weather conditions, floods and earthquakes.

These or other occurrences could result in damage to, or destruction of, mineral properties, personal injury or death, environmental damage, delays in mining, monetary losses and possible legal liability. The Group could also incur liabilities as a result of pollution and other casualties all of which could be very costly and could have a material adverse effect on the Group's financial position and results of operations.

#### **Limitations on the Transfer of Cash or Other Assets**

Euromax is a Canadian company that conducts operations through foreign (principally Bulgaria, Macedonia and Serbia) subsidiaries and substantially all of Euromax's assets consist of equity in, or intercompany loans to its subsidiaries. Accordingly, any limitation on the transfer of cash or other assets between Euromax and its subsidiaries, or among its subsidiaries, could restrict the Group's ability to fund its operations efficiently.

#### **Permitting Requirements**

Mining operations require mining and other permits from the government. These permits may not be issued on a timely basis or at all, and such permits, when issued, may be subject to requirements or conditions with which it is burdensome or expensive to comply. Furthermore, there is no assurance that delays will not occur in connection with obtaining all necessary renewals of existing permits, additional permits for any possible future changes to operations, or additional permits associated with new legislation.

## **EUROMAX RESOURCES LTD.**

Management's Discussion and Analysis

For the three and six months ended June 30, 2015

---

### **OPERATIONAL AND OTHER BUSINESS RISKS AND UNCERTAINTIES - CONTINUED**

#### **Government Regulation**

Mineral businesses are subject to regulation and intervention by governments in such matters as the imposition of specific exploration, drilling and development obligations; environmental protection controls and control over the development and abandonment of resource (including restrictions on production). As well, governments may regulate or intervene with respect to prices, taxes, royalties and the exportation of commodities. Such regulation may be changed from time to time in response to economic or political conditions. The implementation of new regulations or the modification of existing regulations affecting the minerals industries could reduce demand for commodities produced, increase the Group's operating costs and have a material adverse impact on the Group's results of operations and financial position.

#### **Health, Safety and Community Relations**

The Group's operations are subject to various health and safety laws and regulations that impose various duties on the Group's operations relating to, among other things, worker safety and surrounding communities. These laws and regulations also grant the authorities broad powers to, among other things, close unsafe operations and order corrective action relating to health and safety matters. The costs associated with the compliance of such health and safety laws and regulations may be substantial and any amendments to such laws and regulations, or more stringent implementation thereof, could cause additional expenditure or impose restrictions on, or suspensions of, the Group's operations. The Group has made, and expects to make in the future, significant expenditure to comply with the extensive laws and regulations governing the protection of the environment, waste disposal, worker safety, mine development and protection of endangered and other special status species, and, to the extent reasonably practicable, create social and economic benefit in the surrounding communities.

As a mining business, the Group may come under pressure in the jurisdictions in which it operates, or will operate in the future, to demonstrate that other stakeholders (including employees, communities surrounding operations and the countries in which they operate) benefit and will continue to benefit from the Group's commercial activities, and/or that the Group operates in a manner that will minimise any potential damage or disruption to the interests of those stakeholders. The Group currently maintains good relations with local communities in the areas in which it operates and has a demonstrable track record of promoting community and social relations activities for the benefit of local communities. However, the Group may face opposition with respect to its current and future development and exploration projects which could materially adversely affect the Group's business, results of operations and financial position.

Further, certain non-governmental organisations ("NGOs"), some of which oppose globalisation and resource development, are often vocal critics of the mining industry and its practices, including the use of hazardous substances in processing activities. Adverse publicity generated by such NGOs or others related to extractive industries generally, or the Group's operations specifically, could have an adverse effect on the Group's reputation and financial position and may impact its relationship with the communities in which it operates. The Group seeks to mitigate this risk by its commitment to operate in a socially responsible manner. However, there can be no guarantee that the Group's efforts in this respect will mitigate this potential risk.

The Group may also be held responsible for the costs of addressing contamination at the site of current or former activities and could be held liable for exposure to hazardous substances. The costs associated with such responsibilities and liabilities may be significant.

#### **Environmental Risks**

All phases of the Group's operations are subject to environmental regulation in the various jurisdictions in which it operates. There is no assurance that the Group will have or be able to obtain all necessary environmental approvals, licenses, permits or consents or be in compliance therewith or that notwithstanding its precautions, breaches of environmental laws (whether inadvertent or not) will not occur. The lack of or inability to obtain any such approvals, licences, permits or consents or any breaches of environmental laws, may result in penalties including fines or other sanctions, breach of the conditions of a mining concession or other consent or permit with possible revocation of the concession, consent or permit. In this regard, environmental hazards may exist on the properties in which the Group has an interest which are unknown to the Group at present and which have been caused by previous or existing owners or operators of the properties.

Environmental legislation is evolving in a manner which will require stricter standards and enforcement, increased fines and penalties for non-compliance, more stringent environmental assessments of proposed projects and a heightened degree of responsibility for companies and their officers, directors and employees. There is no assurance that future changes in environmental regulation, if any, will not adversely affect the Group's operations, or its ability to develop its properties economically.

## **EUROMAX RESOURCES LTD.**

Management's Discussion and Analysis

For the three and six months ended June 30, 2015

---

### **OPERATIONAL AND OTHER BUSINESS RISKS AND UNCERTAINTIES - CONTINUED**

#### **Tax Matters**

Euromax's tax residency is affected by a number of factors, some of which are outside of its control, including the application and interpretation of the relevant tax laws and treaties. If ever Euromax was assessed to be not tax resident in Canada, it may be liable to pay additional Canadian taxes, including, but not limited to, capital gains tax based on the difference between the fair market value and tax cost of its assets at the relevant time. If such taxes were to become payable, this could have a material adverse effect on the Group's business, results of operations and financial condition. Further, the income tax consequences to holders of common shares would be different from those applicable if Euromax were tax resident in Canada.

#### **Litigation Risks**

All industries, including the mining industry, are subject to legal claims, with and without merit. Defence and settlement costs can be substantial, even with respect to claims that have no merit. Due to the inherent uncertainty of the litigation process, the resolution of any particular legal proceeding could have a material adverse effect on the Group's financial position and results of operations.

#### **Competition**

The Group faces strong competition from other mining companies in connection with the acquisition of properties producing, or capable of producing, precious or base metals. The majority of these companies have greater financial resources, operational experience and technical capabilities. As a result, there can be no assurance that the Group will be able to compete successfully against other companies in acquiring new prospecting, development or mining rights.

#### **Title Matters**

The Group periodically confirms the validity of its title to, or contract rights with respect to, each mineral property in which it has a material interest. However, the Group cannot guarantee that title to its properties will not be challenged. The Group's mineral properties could be subject to prior unregistered agreements, transfers or claims, and title could be affected by, among other things, undetected defects. In addition, the Group might be unable to operate its properties as permitted or to enforce its rights with respect thereto.

#### **Insurance Coverage Could Be Insufficient**

While the Group maintains insurance to protect against certain risks, the nature of these risks is such that liability could exceed policy limits or could be excluded from coverage. There are also risks against which the Group cannot insure or against which it may elect not to insure. Losses from these events may cause substantial delays and require significant capital outlays, adversely affecting future results of operations and financial position.

#### **Dependence on Key Personnel**

The success of the Group and its ability to continue to carry on operations is dependent upon its ability to retain the services of certain key personnel. The loss of their services to the Group may have a material adverse effect on the Group. The Group does not presently have "key person" life insurance for any of its officers.

#### **Carrying Value of Unproven Mineral Right Interests**

Based on annual impairment reviews made by management, in the event that the long-term expectation is that the net carrying amount of certain capitalised development and exploration costs will not be recovered, then the carrying amount is written down to the appropriate fair value, with the write-down amount charged to the income statement. These write-downs could occur if: the carrying amounts of the capitalised costs exceed the related undiscounted net cash flows of reserves and/or its fair value less costs to sell; exploration activities have ceased; exploration results are not promising such that exploration will not be planned for the foreseeable future; or insufficient funding is available to complete the development and exploration programme.

Expected future cash flows are inherently uncertain, and could materially change over time. They are significantly affected by reserve and production estimates, together with economic factors such as spot and forward gold and copper prices, discount rates, currency exchange rates, estimates of costs to produce reserves and future capital expenditures. If any of these uncertainties occur either alone or in combination, it could require management to recognise an impairment, which could adversely affect the Group's business, results of operations and financial position.

## **EUROMAX RESOURCES LTD.**

Management's Discussion and Analysis

For the three and six months ended June 30, 2015

---

### **OPERATIONAL AND OTHER BUSINESS RISKS AND UNCERTAINTIES - CONTINUED**

#### **Conflicts of Interest**

Certain of the directors and officers of the Group are directors or officers of other mineral resource companies and, to the extent that such other companies may participate in ventures in which the Group may participate, the directors of the Group may have a conflict of interest in negotiating and concluding terms respecting the extent of such participation. In the event that such a conflict of interest arises at a meeting of the directors of the Group, a director who has such a conflict will abstain from voting for or against the approval of such matter. Furthermore, in appropriate cases the Group will establish a special committee of independent directors to review a matter in which several directors, or management, may have a conflict.

#### **SUBSEQUENT EVENTS**

There have been no reportable events subsequent to June 30, 2015.

#### **FORWARD-LOOKING STATEMENTS**

This document contains statements that are forward-looking, such as those relating to results of operations and financial condition, capital spending, financing sources, commodity prices, mineral resources and property evaluation plans and programmes. Forward-looking statements are frequently characterised by words such as "plan", "expect", "project", "intend", "believe", "anticipate" and other similar words, or statements that certain events or conditions "may" or "will" occur. Forward-looking statements are based on the opinions and estimates of management at the dates the statements are made, and are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those projected in the forward-looking statements. The forward-looking statements contained in this MD&A are as of the date of this document, and are subject to change after this date. Readers are cautioned that the assumptions used in the preparation of such information, although considered reasonable at the time of preparation, may prove to be imprecise and, as such, undue reliance should not be placed on forward-looking statements. Euromax disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

#### **OTHER MD&A REQUIREMENTS**

As of August 24, 2015, the Group had outstanding 116,842,737 common shares, 20,141,835 share purchase warrants, 9,333,470 share options, with exercise prices ranging from \$0.18 to \$1.05 per share and 1,535,572 restricted share units. Additional information is available on SEDAR at [www.sedar.com](http://www.sedar.com) and at the Group's website [www.euromaxresources.com](http://www.euromaxresources.com).
